

Join Concerned Californians for Arts Education *by signing this petition*

The goal of this petition is to present
100,000 names of arts education
supporters to local school districts.

As a Concerned Californian for Arts Education,
I support the following principles:

- 1** Students in California would benefit from a well-rounded curriculum that balances academics and arts education;
- 2** Arts education encourages out-of-the-box creative thinking, team problem solving, risk taking, and excellence as the standard, all of which are essential to job preparation for the information age;
- 3** Every district should adopt and implement the state standards as soon as possible;
- 4** California should fully comply with the recent Federal mandate calling for arts education to be an equal part of the core curriculum at schools nationwide; and
- 5** As a core curriculum subject, the arts should receive a proportionate share of funding.
